

Software Engineer - Scigen Technologies

Description

Scigen Technologies SA is a company providing innovative software and first class services to scientific Conferences for more than a decade. Our expertise is used worldwide by big medical associations and most of our clients are located in the USA.

For more information about our products and services visit <https://eposterslive.com/>.

What We Are Looking For:

We are looking for a Software Engineer with a strong technical background and a “get-things-done” attitude who is eager to learn new technologies to join our engineering team for a full-time position preferably in our office in Xanthi. Remote employment will also be taken into consideration.

Examples of work you might undertake:

- Work as a team to build new products
- Improve existing features in order to maintain user experience in a high level
- Build efficient and reusable front-end and back-end systems and communicate best practices
- Optimize workflows in order to minimise friction and speed up repetitive tasks
- Create and adapt a codebase capable of supporting quick prototyping and development cycles
- Attend Conferences to deploy our products locally

Requirements

What Skills and Experience you Will Need:

- Excellent knowledge of HTML5, CSS3, JavaScript
- Experience with Frontend Frameworks (preferably Angular)
- Good knowledge of an OO language (preferably Java)

- Experience in SQL and/or NoSQL databases (MySQL, MongoDB)
- Having worked with a version control system (preferably Git)
- Excellent analytical and problem-solving skills
- Intrigued by the product as much as by the technology
- Passion for good markup
- A solid CS background
- Good communication skills and team spirit
- Fluent in English, both oral and written
- Willing to travel internationally 20% of the time

We Will Appreciate if You Have:

- Knowledge of any CSS preprocessor and CSS framework like Bootstrap
- An eye for detail and a sense of design
- Comfort in TDD and other testing practices
- Experience implementing/consuming REST APIs
- Comfortable with UNIX operating systems

Bonus Points:

- Experience in Java EE
- Experience in a CMS (Drupal, Wordpress) and knowledge of PHP is a huge plus
- Typescript and ES6
- Experience with a state management library (preferably Redux)
- Contributed in open-source projects.

Please include links to repositories or work you are proud of.

Our stack:

- Angular, Node.js, J2EE
- Drupal
- MySQL, MongoDB,
- JavaScript, TypeScript, PHP
- HTML, CSS

Infrastructure:

- AWS
- Firebase
- Heroku
