

Are you searching for Research assistant position, PhD or Postdoc on Epigenetics?

The **Kostareli lab at Queen's University Belfast** in United Kingdom has opened in 2018 and we are at the recruitment phase in order to build an enthusiastic group which will work on Lymphocytes Epigenetics in Leukaemia/Cancer.

The lab is part of the newly built Centre for Experimental Medicine at School of Medicine at Queen's University Belfast. Modern facilities and equipment, multidisciplinary, a very well-organized graduate school and a very active postdoctoral community offer an attractive international research environment.

If you want to learn more about these opportunities please do contact Dr. Effie (Efterpi) Kostareli:

- email: e.kostareli@qub.ac.uk
- Twitter: @kostareli
- LinkedIn: Effie Kostareli
