Annotation: Consider: The social characteristics of the youth, its position in the process of reproduction of the social structure, as well as the ability not only to inherit, but also to transform the existing socio-political relations. The contradictions that arise within this process underlie a whole range of specific youth problems, including the commission of offenses and crimes by members of various youth groups and other forms of antisocial behavior.

Key words: youth subculture, public organizations, typology, antisocial behavior, prosocial culture.
