ALTAIR GREECE INTERNSHIP: JUMPSTART YOUR CAREER

At our core, we're explorers, adventurers, and pioneers. We're the brains behind some of the world's most revolutionary innovations, the trailblazers that make the impossible possible, the people discovering new solutions to our customers' toughest challenges. Because of this, Altair offers a cutting-edge internship program that fosters innovation, leadership, and a passion for making a difference. Here, you'll play a critical role in helping us turn today's problems into tomorrow's opportunities.

Altair Greece offers a paid 11-month internship program for students or recent graduates that will help you make an impact and jumpstart your future. We're interested in candidates who are pursuing mechanical, civil, electrical, or aerospace engineering, and physics, mathematics, and/or computer science concentrations.

Freedom to explore technical trends, breakthrough technologies, and meaningful projects, that will have a real-world impact.

Collaborate and partner with our top global innovators and engineers on up-and-coming trends, and the newest, most advanced technologies on the market.

Grow and learn in our development program designed to enhance leadership, communication, and professional skillsets.

Team up with other interns and Altair's best and brightest to build your professional network in a fun, inclusive, supportive environment.

Altair provides an inclusive rewards package that features competitive wages, remote work and flex time, and opportunities to advance your career.

We believe that empowering each authentic voice encourages an entrepreneurial mindset. We've created a culture where our diversities and experiences are embraced and essential to our success.

Interested in the internship opportunity of a lifetime? Reach out to us via email at hellenic@europe.altair.com, or visit our global career website.
