

Intern

as a frontend developer

(m/f, full-time, Berlin)

FACTOR-E | ANALYTICS

We want to revolutionize the manufacturing industry by making Internet of Things easy and accessible. Do you want to help build our new product from scratch as part of an international team? Join our TU-Berlin startup that brings Big Data and streaming analytics to manufacturing facilities and at the same time saves energy!

Factor-E Analytics interconnects production equipment using smart sensors, collects energy data continuously and streams it to our software-platform in the cloud. By analyzing the data and deriving improvement measures in real-time, we offer our clients new ways of optimizing their production processes and boosting their energy efficiency.

Your tasks:

- Design user-friendly UIs and add functionalities to the frontend
- Support the team in development tasks
- Contribute ideas for the improvement of the overall solution

Your profile

- Ongoing or Completed Computer Science (BSc or MSc) or a related technical discipline
- Experience in UI design using JavaScript and related libraries like jQuery, Chart.js, Bootstrap.js
- Exposure to AJAX, HTML and CSS (preferably HTML5 and CSS3)
- A good sense of aesthetics
- Some exposure to Python, Django or PostgreSQL is a plus
- You should be able to work independently and provide some proof of practical experience (previous projects during an internship or a GitHub repository)

What we offer

- Challenging and cutting-edge development opportunities
- An office in the heart of Berlin (at the Centre of Entrepreneurship of the TU Berlin), surrounded by other startups
- An open, young and ambitious team
- Possibility to join our team on a permanent basis
- Flat hierarchies with high responsibility
- Flexible working hours and home office possibilities

If you are interested in applying for this position, please send your documents in German or English to team@factor-e.eu. We are looking forward to hearing from you!
