

qmetric | HR Solutions is currently recruiting, on behalf of **Pollfish**, the position of

Senior Mobile Engineer

The company

Pollfish is a mobile survey monetization network delivering surveys instead of ads through mobile apps. Their mission is to help app publishers make money from their apps with a new fun and interactive way through market research. They work, at the moment, with more than 140k mobile apps and websites all over the world gathering insights from more than 550M consumers.

The position

We are looking for a talented **Senior Mobile Engineer** to work with Pollfish SDKs and plugins and help deliver a unique and smooth experience both to Pollfish app publishers and to the end-users.

We are looking for a senior cross platform mobile engineer (Android, iOS) who gets excited with the latest advancements in the mobile app ecosystem and the global impact that can be made through Pollfish which is the pioneer in survey monetization in the apps world.

Some of the key responsibilities will be:

- Building, supporting and documenting Pollfish SDKs and plugins for different platforms
- Testing via automated methods, including but not limited to writing and running unit tests, UI tests, integration tests, as well as testing using manual methods
- Working closely with the support team to resolve issues from partners and users related to the SDKs.

Your profile

- Experience in creating and supporting iOS and Android libraries/SDKs or apps
- Experience launching apps on different app stores
- Exposure to TDD and automated testing
- Solid understanding of the full mobile development life cycle
- Experience working with design patterns
- Based on the knowledge of the general mobile landscape, architectures, trends, and emerging technologies, guide decisions on architecture and technical strategy
- Experience with Swift and Kotlin

Let's achieve!

- Has done some really cool stuff and optionally has a Github profile to demonstrate them
- Can operate in a fast-paced startup environment.

Our Client offers

- Stock option plan
- An attractive salary package
- Employer sponsored health insurance plan
- Monthly coupons for personal groceries
- Flexible working hours, ability to occasionally work from home
- Healthy food, snacks and beverages
- Weekly lunches
- Pleasing and flexible startup environment
- Part of an innovative tech company.
