

CAE Specialist

Netherlands

A large Dutch high-tech transportation manufacturing company is looking for a CAE specialist to play an important part in the continuous improvement of the company's vehicles.

Responsibilities

- Provide support and advice to design engineers to optimize frames, exterior parts, component parts and fixation of lighting systems for various vehicle projects
- Initiate reports and presentations to archive results
- Develop and optimize methods and procedures to achieve more accurate predictions
- Work in close cooperation with testing and design engineers

Profile

- MSc in Mechanical Engineering
- At least 3 years of working experience with Abaqus, Hyperworks and Matlab (linear/non-linear)
- Strong knowledge of commercial vehicles, vehicle dynamics and durability/fatigue principles
- Ability to implement improvements within design constraints
- Effective reporting, presentation and communication skills
- Pro-active and flexible attitude
- Fluent English

If you find this opportunity of interest, please submit a copy of your latest CV to talent@envisage.media, along to a cover letter stating the reasons why you believe this role meets your profile and what are the main reasons you are ready to move to Netherlands.
