## CLOUD SYSTEM ADMINISTRATOR-Berlin

A new Video on Demand (VOD) platform Berlin based with a global reach is growing and needs a Frontend Developer.

### JOB OVERVIEW
Looking for a self-motivated and passionate engineer who will join us to work on this young company's vision of a transparent, fair and truly international film market.
They are thinking big and want to build a powerful cloud-based highly scalable infrastructure.

### IDEAL QUALIFICATIONS & SKILLS

• 3-years+ experiences as system and cloud administrator
• Large scale applications, dynamic scaling, high availability and performance requirements
• Cloud-based infrastructure, preferably AWS
• Migrating and maintaining applications in cloud environment
• Continuous integration and experience with open source DevOps tools
• Resolving security bottlenecks with hardware and software in cloud environment
• Administration of technologies like DNS and routing, mail, authentication services, firewalls
• Bash, Java, NodeJS, PHP, Git, Jenkins, Ansible
• Preferable: Digital film, media and streaming experience, university degree

### BENEFITS
• Continuous growth opportunities in a rapidly growing startup.
• Motivated and skilled team of film-lovers/tech-lovers/brand-builders.
• Well-equipped, lean and pragmatic set up
• Modern office in the center of Berlin.

So, think you're ready to make a huge impact in team? Send us an e mail at alpha.employment@outlook.com  we will take care of the application for you and get you an interview!
