

For our Competence Centre Wetlands, located in the Middle East we are looking for a

Design Engineer - Water (m/f)

Our Wetland Competence Centre is an internal and external service department supporting our international sales force, our subsidiaries and our clients.

The Wetland Competence Centre is leading the technical and commercial strategy for our innovative and unique wetland technology and is further responsible for the internal know-how management and new developments according to market requirements within the group.

Wetland designs, cost estimation, tender management, development into new business segments according to the group strategy are the core activities of the Wetland Competence Centre. You will be member of our technical team of senior and junior engineers and technicians for wetlands design.

Your responsibilities:

- To perform design and engineering of wastewater treatment projects for large scale industrial facilities (Oil & Gas, sewage water, food processing industries, etc)
- Other responsibilities would include project co-ordination, planning and commercial control,
- To propose process design to optimize construction cost and to maximize operational efficiencies,
- To develop calculations of chemical dosing systems, pumps, pipework, tanks, instrumentation and controls,
- Undertaking design checks of Junior staff,
- To prepare specification for material and equipment,
- Ability to produce detailed designs in AutoCAD is required,
- Effectively document through written reports all process development activities.

Your profile:

- Minimum of a Master degree with Long-term experience in waste water treatment design and civil engineering. Constructed wetland experience is an advantage,
- Full proficiency in Microsoft Office and AutoCAD,
- Demonstrate ability to work independently,
- Solid experience in working in a team with team building capabilities,
- Exceptional inter-personal and relationship building skills,
- Long-term planning skills and innovative thinking
- Excellent knowledge of spoken and written English

We offer an employment based on a local contract in Oman.

If you are interested in the position, please send CV and Cover Letter to BNO.muscat@bauer.de.

Mail's subject will be written as followed: "Design Engineer- FAMILY NAME".
