MID-LEVEL SOFTWARE ENGINEER

Job description

We are a fast-growing International IT Company, leaders in our market, and focused on the aquaculture industry. We have a strong innovative business team with huge experience in a niche market, with immense growth potential.

We are looking for a Mid-Level Software Engineer with a strong passion for technology and eagerness to deliver tangible and innovative software solutions.

Our Mid- Level Software Engineer will serve as a key member of the [aquaManager](#) team, in an environment that promotes collaboration, creativity and initiatives.

If you are a self-motivated, team-spirited talent and up for a big challenge, we offer you a cool place to broaden your career horizons, a competitive deal, and a pathway to work and communicate with people from all over the world!

Responsibilities

- Write efficient, testable and quality code
- Maintain and optimize existing software applications
- Analyze requirement and develop software solutions
- Troubleshoot programming bugs

Requirements

- At least 3 years of software development using C#
- Good knowledge with source control tools (Git, TFS)
- Advanced experience in relational database design and SQL is essential
- Team collaboration skills
- Strong analytical, problem-solving and time-management skills
- Fluency in English (both written and verbal)
- Desire for continuous learning, growth mentality

We offer

- Competitive remuneration package
- Work in an international, dynamic and fun environment, together with a team of young people with a compelling vision
- Continuous training, professional and personal development opportunities
- Openness to new ideas and initiatives and freedom to operate

Employment Type
Full-time
