Audio Product specialist (PRD02)

(Full-time position in Patras, Greece)

Company description

We are accusonus (www.accusonus.com) and we are obsessed about changing the way music is produced and recorded. We build music software products for musicians, producers and sound engineers. Our patented artificial-intelligence tools revolutionize the music production workflow by introducing capabilities never-before thought possible. We have released a number of successful products used in thousands of recording studios around the globe, as well as from some of the most notable musicians and producers. We are funded by both institutional and private investors.

You will be responsible for:

- Creating multimedia educational and promotional content that highlight and explain the accusonus products' features and workflows
- Writing clear technical and educational documents
- Providing friendly and efficient user-support
- Working with the team to test products and assure excellent quality

You could be a good fit if you have:

- Excellent knowledge of fundamental sound engineering concepts
- Full professional or native proficiency in English (oral and written)
- Excellent knowledge of audio recording, editing and mixing
- Excellent knowledge of at least one DAW and related workflows
- Excellent knowledge of a video/photo editor

And it would be great if you also have:

- Previous involvement in Pro Audio product development
- Knowledge of live sound reinforcement techniques
- Familiarity with internet marketing techniques

What you get

- You will deal with products that will be used by world's top music producers and sound engineers. Your work will equally affect the next billboard hits and the avant-garde music masterpieces!

- Isn't that enough? If not, keep in mind that we also offer:
 - o A competitive salary
 - o A great working environment
 - o The opportunity to join a talented and hard-working team

If you would like to join the Accusonus team, you are welcome to send your CV to careers@accusonus.com (subject: "Application for PRD02")
