

QA Tester

Job Description:

We are looking for a talented QA Tester who designs and executes testing for applications and systems implemented using custom technologies on behalf of one of our major clients, in banking sector.

If you are interested, keep on reading!

The member requires to have deep skills in core testing, technical testing and business domain/processes to perform all the levels of testing – functional, system integration, end to end across the application and for user acceptance testing manually. Moreover, performs tasks to understand business requirements, design optimized test scenarios, plan testing activities, estimate work efforts, create test cases, identify test environment and test data requirements, identify dependencies on external and internal applications, execute test cases manually, report test status, perform defect creation, triage and resolution and analyze the test outcome for continuous improvements using analytical and cognitive techniques and tools. More than a set of skills, we are looking for someone who is curious, collaborative, great at communicating, highly technical and is always willing to learn.

Key Qualifications

- BSc in Computer Science or relevant field
- Detailed knowledge/understanding of Banking testing and manual testing methodology will be considered as a plus
- Strong communication and management skills
- Greek language is mandatory

Benefits:

- Private insurance
- Continuous learning (with the most modern methods), and fast career growth
- Interesting and challenging work within large-scale projects
- International dynamic, fast-paced working environment
- Opportunity to work in a diverse environment with talented colleagues

Our recruitment consultants will go through your Curriculum Vitae as soon as possible and get back to you to discuss the opportunity for which you apply. If you don't hear from us in the coming ten (10) working days, you may consider that you have not been selected for the particular job.
