

QA Automation Engineer

Who we are

e-Travel is one of the top 10 online travel agencies in the world in selling flight tickets and one of the most successful start-up ventures in Greece. Launched in 2007 we have reached a gross sales volume of EUR 450 million. We have a global presence with customers in more than 200 countries and we provide multiple currency and language options. Our Websites are pamediakopes.gr, my trip.com, trip.ru, trip.bg, trip.ua, trip.ae, trip.kz, avion.ro, airtickets24.com and fantasticgreece.com

Our diverse & dynamically growing team of 170 people would be happy to welcome more innovative and enthusiastic people ready to join us in our journey to the top!

Position Summary

We are looking for a passionate QA automation engineer to join our team and add value to the whole company. Here you'll be testing applications that serve millions of happy customers. Systems under test include a wide array of diverse and state of the art technologies. So, if you smirk when someone says that his code is bug free, you have a keen eye for detail and you enjoy challenges, then you definitely belong to our QA team and to the whole e-Travel family!

Responsibilities

- Design and implement test cases to run in an automated environment.
- Execute automated test scripts, and manual testing if needed.
- Debug and fix existing failed automated test cases.
- Maintain existing automation framework and suggest improvements.
- Design and execute regression test suites.
- Work closely with software and product developers.
- Create bug reports, and test bug fixes.
- Propose new testing methods, tools & frameworks.
- Drive quality assurance lifecycle.

Requirements

- A relevant B.Sc./B.A. degree.
- Have a strong testing mindset.
- Strong problem solving skills.
- Attention to detail (nothing goes untested).
- A continual outlook towards establishing the best practices, whether in manual or automated testing.
- Strong interpersonal skills / active listener.
- Enjoy working in an Agile environment.
- Ability to prioritize quickly, act proactively and adapt to changes.
- Knowledge of Java (experience in Java development and/or creating Java automation scripts considered a plus)

What we offer

- The opportunity to work in a company with a unique culture & creative people
- The chance to grow professionally & personally in one of the top e-companies in Greece
- The privilege to see your ideas and aspirations come to life
- Complimentary private health insurance
- Yoga lessons and afternoon ping pong matches to help you take the edge off
