

Back End Developer - RD008

Location: Thessaloniki

SEEMS PC, a Greek start-up focused on IoT solutions development employing Artificial Intelligence techniques, is looking for a highly-motivated Back End Developer who has strong interpersonal skills and the ability to solve complex problems. As a Back End Developer, you will join our software development team to implement challenging R&D projects.

Responsibilities

- Designing, coding, unit testing, and debugging with focus on usability and performance
- Cooperating with the development team
- Writing clean, maintainable, efficient and reusable code and libraries
- Providing optimization ideas to achieve speed and scalability
- Keeping up with emerging technologies
- Providing solution to real-world problems
- Proposing ideas for additional products, techniques, tools and services
- Troubleshooting and supporting existing products and infrastructure

Requirements

- BSc / MSc in Information/Computer Science, Software Engineering or equivalent
- 2+ years of experience in developing software applications (desktop, mobile, web)
- Strong programming abilities in OOP (Java or/and .NET)
- Strong skills for ASP.NET, C#, MVC, JSON, .NET Framework, Entity Framework
- Experience in NoSQL or SQL databases
- Experience on code versioning tools, such as Git
- Experience in designing and developing RESTful APIs
- Excellent use of English language
- Completed military obligations (for male candidates)

Considered as a plus:

- Knowledge of cloud computing (AWS, Azure, etc.)

Benefits

- Working environment which inspires team spirit and cooperation

- Enthusiastic and open-minded multidisciplinary team
- State-of-the-art tools, libraries and technologies
- Cooperation with the greatest R&D organizations and institutions
- Training opportunities for continuous personal improvement

If you strive for innovation and want to work with state-of-the-art technologies join us! Send us your detailed CV, at hr@seems.gr, quoting reference: (RD008).
