

qmetric | HR & Career Solutions is currently recruiting, on behalf of [codebender](#), the position of

UI/UX Designer (Job opening ID: UIUX1)

The company

[Codebender](#) is a rapidly growing and well-funded Greek startup. Its [creative team](#) aims to change the way software and hardware is developed, advance the maker movement and bring more hackers/inventors/artists/crazy scientists to the world!

The position

The successful candidate will be working on the design of [codebender.cc](#), an online development platform for Arduino and other maker-friendly embedded devices, which helps people program and design cool hardware stuff faster, easier and more productively. In particular, his or her main duties will include:

- Execute all visual design stages from concept to final hand-off to engineering
- Conceptualize original ideas that bring simplicity and user friendliness to complex design roadblocks
- Create wireframes, storyboards, user flows, process flows and site maps to effectively communicate interaction and design ideas
- Present and defend designs and key milestone deliverables
- Establish and promote design guidelines, best practices and standards
- Collaborate with product management and engineering to define and implement innovative solutions for the product direction, visuals and experience
- Conduct user research and evaluate user feedback.

Your profile

In order for you to be able to successfully carry out the duties of the job, you should possess the following:

- Demonstrable graphic design skills with a strong portfolio
- Solid experience in creating wireframes, storyboards, user flows, process flows and site maps
- Proficiency in InDesign, Illustrator, Photoshop, or other visual design and wire-framing tools
- Possession of creative flair, conceptual/visual ability and originality, with a user-system interaction mindset
- Up-to-date with the latest Web trends, techniques, and technologies

- Extra Mega Bonus: be a Maker (know about Arduino, build things like quadcopters, 3d printers, or potato launchers in their spare time).

Significant bonus points will be given to applicants who:

- Have 3+ years of experience
- Are proficient in HTML, CSS, and JavaScript for rapid prototyping.
- Have experience in working in an Agile/Scrum development process
- Have a BS/MS in Human-Computer Interaction, Interaction Design, or a Visual Arts subject

Our Client offers

In case you are selected for the position of UI/UX Designer, you will have access to the following:

- Competitive remuneration package
- Stock option plan
- Social security (your social security contributions are covered by the company)
- Lunch and caffeine is on the house (for the employees based in Patras HQ)
- Training and continuous development opportunities (attendance expenses paid for training events & workshops by the company)
- Participation in monthly team building activities & events (wine tasting and winery visits, paintball etc.)
- Excellent opportunities for advancement & career development
- A dynamic work environment.

Are you interested?

Are you a talented UI/UX Designer who wants to create amazing user experiences in a challenging environment? Are you THE ONE who has an eye for clean and artful design, possesses superior user interface design skills and is able to translate high-level requirements into interaction flows and artifacts, and transform them into beautiful, intuitive, and functional designs? Are you thrilled by the prospect of advancing your already successful career and developing professionally in an innovative, well-funded and fast-growing company?

If yes, please click [here](#) in order to submit your application.

The selection process

qmetric applies a demanding selection process, in order to ensure its fairness. Shortlisted candidates will be assessed with the use of Competency Based Interviews, personality and work sample tests.

Our company treats each application with strict confidence
