

qmetric | HR & Career Solutions is currently recruiting, on behalf of [Pockee](#), the position of

iOS Developer (Job opening ID: IOS1)

The company

[Pockee](#) is a unique mobile coupon platform that brings FMCG brands together with retailers, eventually enabling consumers to get real discounts on their everyday grocery shopping, all on their mobile phone, not having to print or collect paper coupons. It's globally first on 100% mobile couponing, embodying a technology that addresses all concerns in the FMCG industry. Pockee's ambition is to bring a small revolution in the local multi-million promotions industry and a big one in the global multi-billion promotions industry!

Pockee is a [well-funded startup](#) and it's portfolio currently includes the [leading brands](#) and retailers in Greece and is [constantly growing](#).

The position

The successful candidate will be based in Athens and he or she will be working on the development of the next generation [Pockee mobile app](#). As a member of the Pockee team, he or she will have ownership of designing and building innovative mobile applications for iOS, further build his or her capabilities and participate in the acceleration of an already fast-growing app.

Your profile

In order for you to be able to successfully carry out the duties of the job, you should possess the following:

- BS/MS degree in Computer Science, Engineering or a related subject
- 2+ years of software development experience
- 2+ years of iOS development
- Have published one or more iOS apps in the app store
- A deep familiarity with Objective-C and Cocoa Touch
- Experience working with iOS frameworks such as Core Data, Core Animation, Core Graphics and Core Text
- Solid experience with third-party libraries and APIs (crash reporting, analytics, push notifications services etc.)
- Experience with version control systems
