

# Norrbotten County Council needs Radiologist and Child Psychiatrist

## The County Council

The county council is the county's largest employer. As an employee of the county council, you will be working in a stimulating environment where you can exert influence and make a difference, helping to improve the health of the county's inhabitants. The county council offers good holiday agreements and pension provisions, advantageous insurance policies, health and wellness subsidies, sick pay, and potentially flexible working hours and supplements to parental insurance. The county council also contributes to skills development in the form of leader development programmes, courses, lectures, mentoring, networking and research projects. Norrbotten County Council has five hospitals and 33 health care centres, and is a leading authority in Sweden within e-health. For more info, <http://www.nll.se/sv/Om-landstinget/Other-languages/EnglishEngelska1/Jobs-and-future/>.

## Sunderby Hospital

Sunderby Hospital is a county hospital with specialist functions, as well as a local community hospital for Luleå and Boden. The hospital provides both emergency and scheduled treatment within all specialist areas except thoracic surgery and neurosurgery. The hospital has 2,500 employees and 400 beds. The hospital provides medical training from semesters six to eleven.

## Norrbotten

The county Norrbotten is experiencing a period of strong development, both economically and culturally. Here you will find energetic, warm and considerate people, community services, cities and wilderness areas. Norrbotten offers good opportunities to balance work and leisure.

## As a Radiologist – about the workplace

The County Clinic for Radiology (BFM) at Sunderby hospital in Norrbotten runs radiology services at the county's five hospitals: Sunderby, Piteå, Kalix, Gällivare and Kiruna. Sunderby Hospital and Gällivare Hospital accept emergency admissions. County-wide PACS (GE) and an integrated RIS/HIS system covering the entire county enable work to be conducted beyond the confines of the hospital.

All the hospitals are equipped with modern technology. The county has six CT scanners, three MRI scanners, modern ultrasound equipment and digital technology for conventional radiology. Sunderby Hospital runs a successful advanced angiography service. Sunderby Hospital is home to a number of county services, nuclear medicine and mammography, and also has a hospital-based emergency duty service. There are approximately 700 doctors working for Norrbotten County Council, around 20 of whom work at the X-ray Clinic at Sunderby Hospital.

## Your duties as a Radiologist

This position involves working with radiology modalities, image review, ultrasound, interventions, rounds, etc. The members of the Radiology team demonstrate great commitment and there is excellent cooperation between the various hospitals. We offer generous terms for continued in-service training.

## **Your background as Radiologist**

Specialist physician in clinical radiology with an EU licence to practise, preferably interested in MR and ultrasound. We expect you to be a committed and flexible person who works well with others. You must be interested in development and change work. We value personal suitability.

## **As a Child and Adolescent Psychiatrist – about the workplace**

Child and adolescent psychiatry is part of the child health care service and comprises outpatient clinics, an emergency 24-hour care facility and a neuropsychiatric unit.

Our mandate is to be a specialised function that focuses on helping families with children with mental-health problems of all ages. We work as an interdisciplinary team and have established cooperation with providers of bordering health care services and other partners. We focus in particular on developing the assessment, examination and treatment process. Work is under way county-wide to establish joint care programmes and procedures. There are good opportunities for further training and research.

## **Your duties**

As a doctor specialising in outpatient child and adolescent psychiatry, you will be tasked with assessing, examining and treating young psychiatric patients. You will work both independently and in close cooperation with the other members of the team. You will be responsible for the care of patients and for development of the unit, together with the clinic administrator and the unit manager.

You will be working principally in outpatient services, although you may be required to spend some time working in 24-hour care services, if necessary. Sunderby Hospital is a teaching hospital for Umeå University and we therefore also train medical students. This role also involves supervision of doctors receiving specialist medical training and general medical training.

## **Your background as a Child and Adolescent Psychiatrist**

We are looking for doctors with specialist competence within the field of child and adolescent psychiatry with an EU licence to practise. Doctors specialising in other fields within paediatrics or psychiatry with an EU licence to practise, who are interested in specialising in child and adolescent psychiatry, are also welcome to apply.

## **Employment facts**

We offer permanent, full time employment. We will help with practical arrangements like accommodation and introduction programme, and provide language training.

## **Salary**

The county council practises individual salary setting in accordance with collective agreements.

## **Interested?**

In the beginning of October we will visit Athens and Thessaloniki at the Eures “Sweden week” and hold interviews.

Send your application and personal letter, no later than **6<sup>th</sup> of September**, to [health@arbetsformedlingen.se](mailto:health@arbetsformedlingen.se), write “Greece” in the subject line of your mail.
